Level IIIA

This concealable ultra-light 10 x 12 trauma plate weighs less than 1 lb. and offers anti-stab protection and advanced multi-hit pistol-caliber protection. During recent testing, this lightweight plate stopped 10 rounds of .45 ACP at a start distance of 25ft and moving into the target with the final shot at 1ft. with no spall or ricochet. These plates are drop safe and do not require expensive X-rays or special maintenance. These lightweight plates offer advanced protection in a highly concealable form. They need no special maintenance.

Level III

This ultra-light body armor provides today's first responders and military personnel with advanced protection and comfort, even when worn all day. At 3.3 lbs. this 10" x 12" multi-hit plate stops rifle rounds up to .308 Winchester, 12 gauge 1 oz. rifled slugs, .223, 7.62x39 (AK-47), and pistol rounds. Since the core material used in the manufacturing of the plate captures bullet fragments, it reduces spall and ricochet to essentially zero. These lightweight plates are completely drop safe and do not require expensive X-rays or special maintenance. In addition to the long shelf-life and enhanced ballistic protection, this body armor also provides positive buoyancy - it floats!

Level III+

This ultra-light body armor provides today's first responders and military personnel with advanced protection and comfort, even when worn all day. At 5.5 lbs. this 10" x 12" multi-hit plate stops rifle rounds up to .308 Winchester, 12 gauge 1 oz. rifled slugs, .223, 7.62x39 (AK-47) and the M855 Green tip Penetrator, and pistol rounds. Since the core material used in the manufacturing of the plate captures bullet fragments, it reduces spall and ricochet to essentially zero. These lightweight plates are completely drop safe and do not require expensive X-rays or special maintenance.
